

Yard Manager v3

The Digital Solution for Efficient
& Multilingual Yard Logistics

Transforming gate arrivals into a professional, safe, and highly efficient digital workflow.

The Challenge: Chaos at the Gate

Manual processes create bottlenecks, language barriers, and critical safety risks.

The Solution: Digital Yard Control

Airport-style check-in meets an automated, native-language paging system.

The Digital Gatekeeper

Self-service kiosk with native-language support captures driver and load details instantly.

The Dispatch Brain

Intelligent cloud platform centralizes data, manages scheduling, and optimizes dock allocation automatically.

The Automated Pager

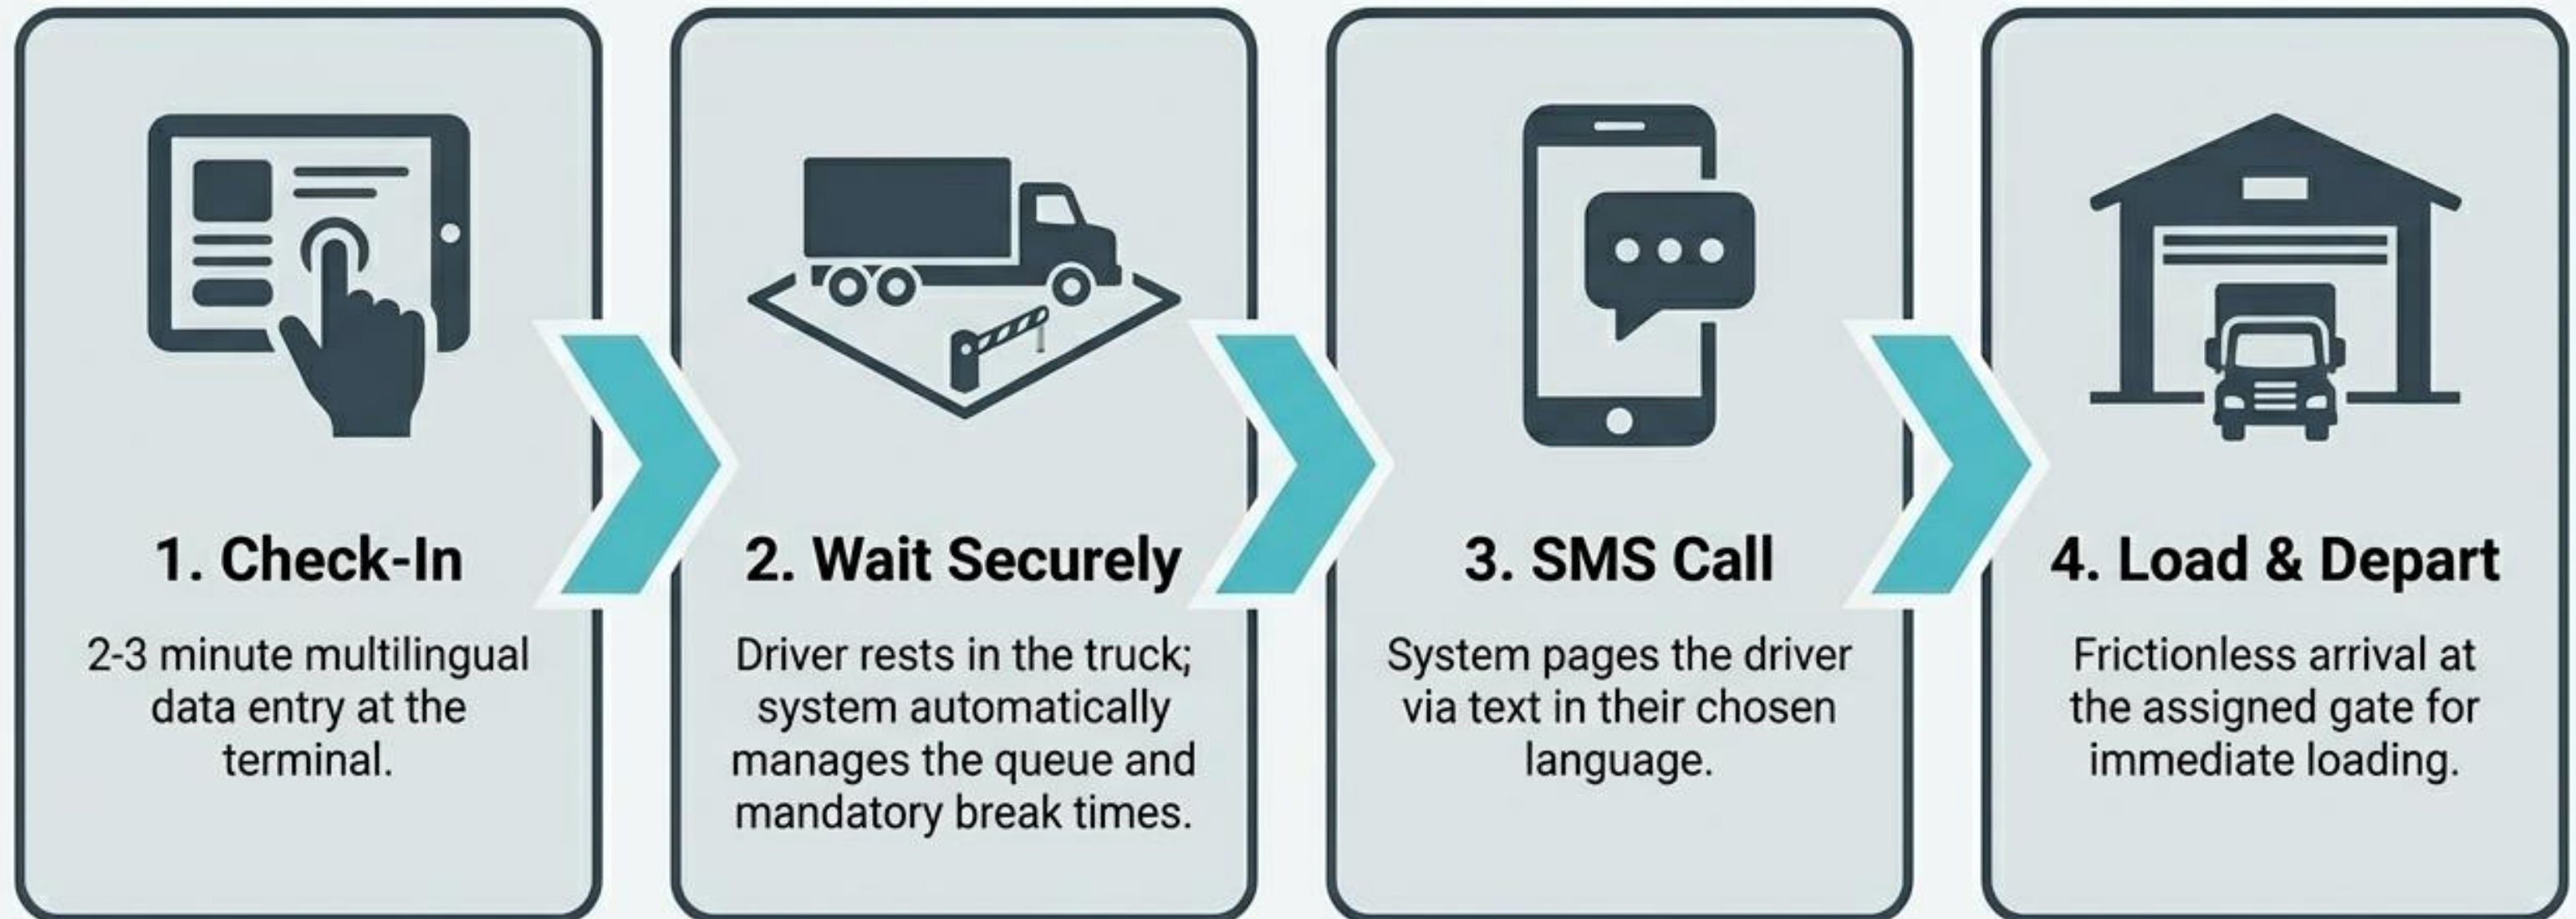

Real-time, native-language SMS notifications guide drivers directly to their assigned locations.

Simple for drivers. Powerful for managers. Professional for your company.

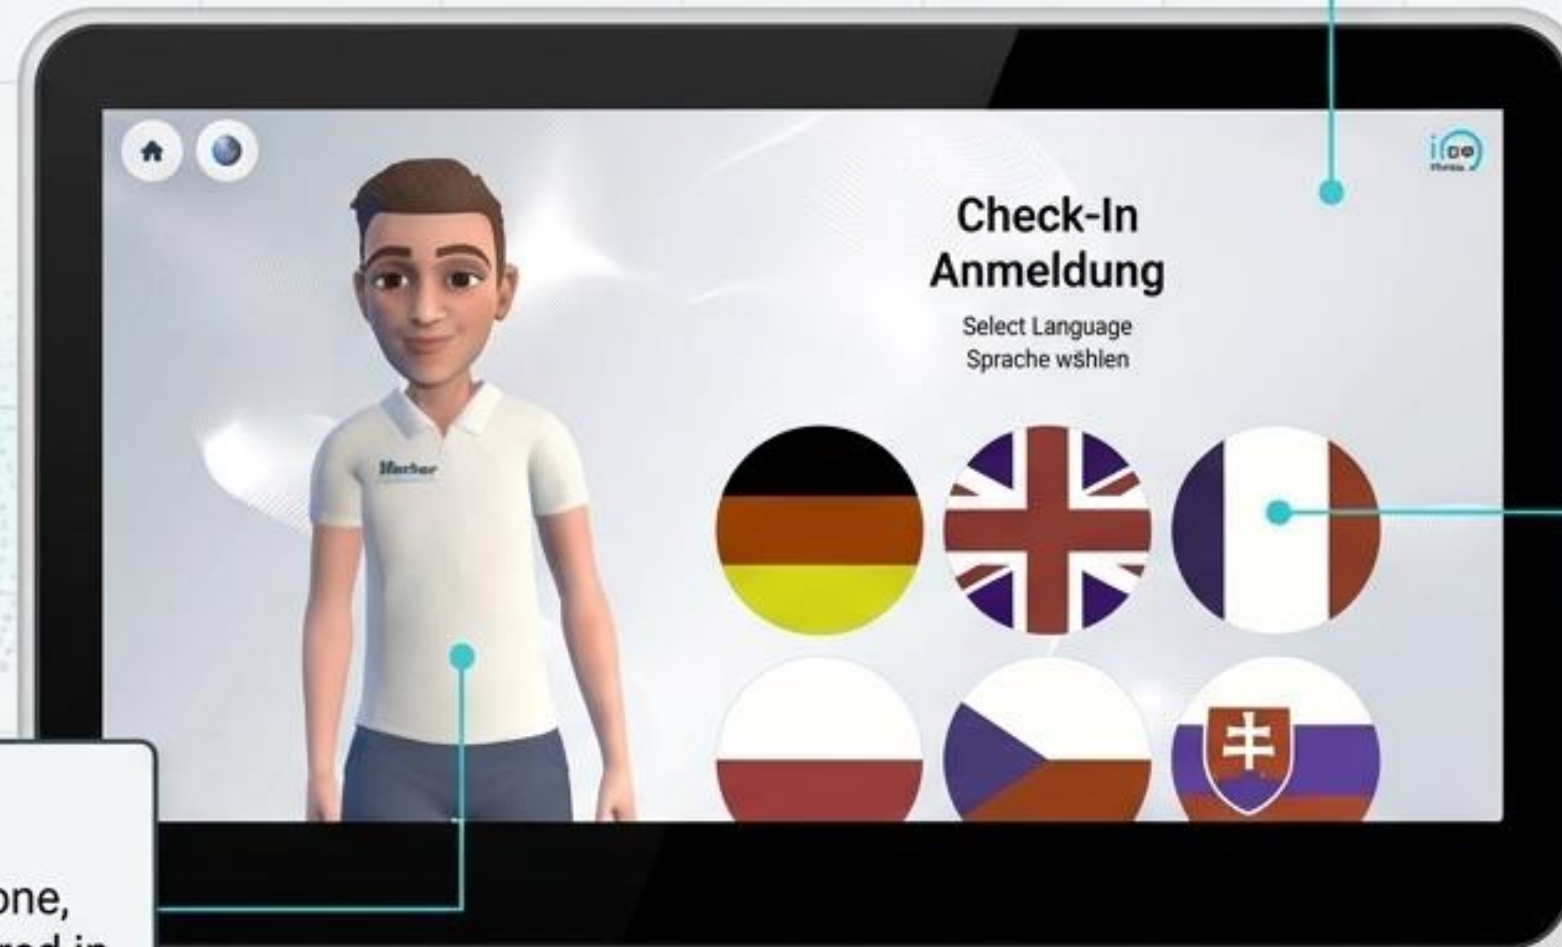

The 4-Step Digital Flow

Replacing physical waiting lines and paperwork with a 24/7 automated process.

Step 1: The Digital Gatekeeper

Over 40 languages supported to eliminate communication barriers instantly.

3

'Fast-Lane' System

Returning drivers use a unique ID to skip repetitive steps, saving 5-10 minutes per visit.

1

Native Language Selection

Drivers select their flag. The entire process—text, video, and final SMS—adapts instantly.

2

Rapid Data Entry

Name, License Plate, Phone, and Order Number captured in under 3 minutes.

Step 2: Uncompromising Safety & Compliance

100% documented, legally binding safety briefings without human effort.

Mandatory Video

Drivers must watch a customized safety briefing (2-5 mins) in their native language.

Digital Signature

Drivers legally confirm understanding directly on the touchscreen.

Bulletproof Documentation

Signatures and timestamps are automatically stored in the database. Close your liability gaps permanently.

Step 3: 'Air Traffic Control' for Dispatchers

A live, real-time overview of the entire yard with simple drag-and-drop management.

1 Traffic Light Logic
Clear color coding shows exactly who is Waiting (Yellow) vs. Loading (Green).

2 Complete Visibility
Instantly see wait times, driver details, and gate assignments.

3 Automated Queueing
The system respects first-come-first-served logic while automatically withholding pages during a driver's mandatory legal rest periods.

Step 4: Automated Paging & Frictionless Loading

Keeping the queue flowing without a single phone call.

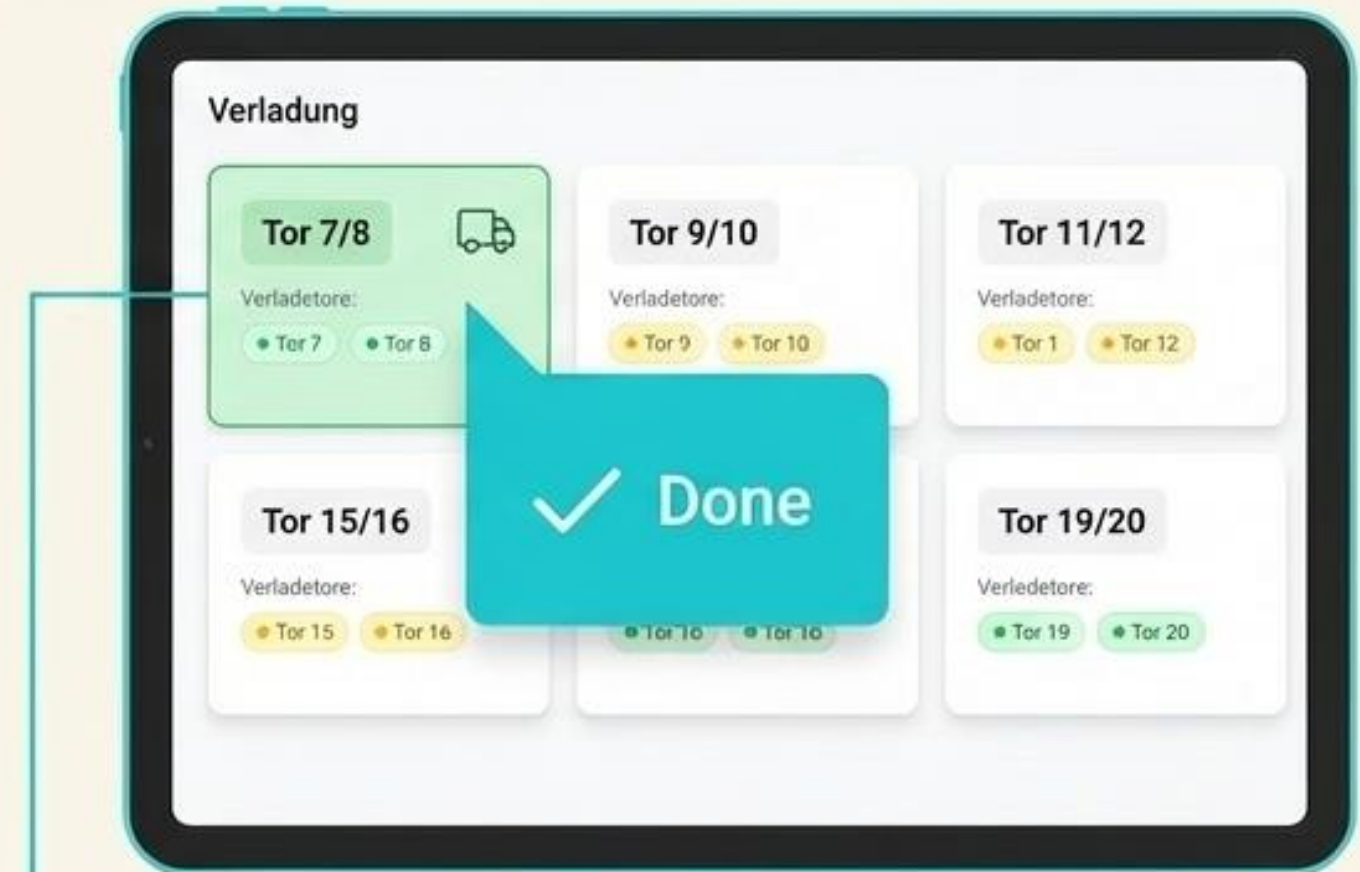

The Driver

No More Wandering

Drivers are paged directly to their cabs when a gate is ready.

The Loader

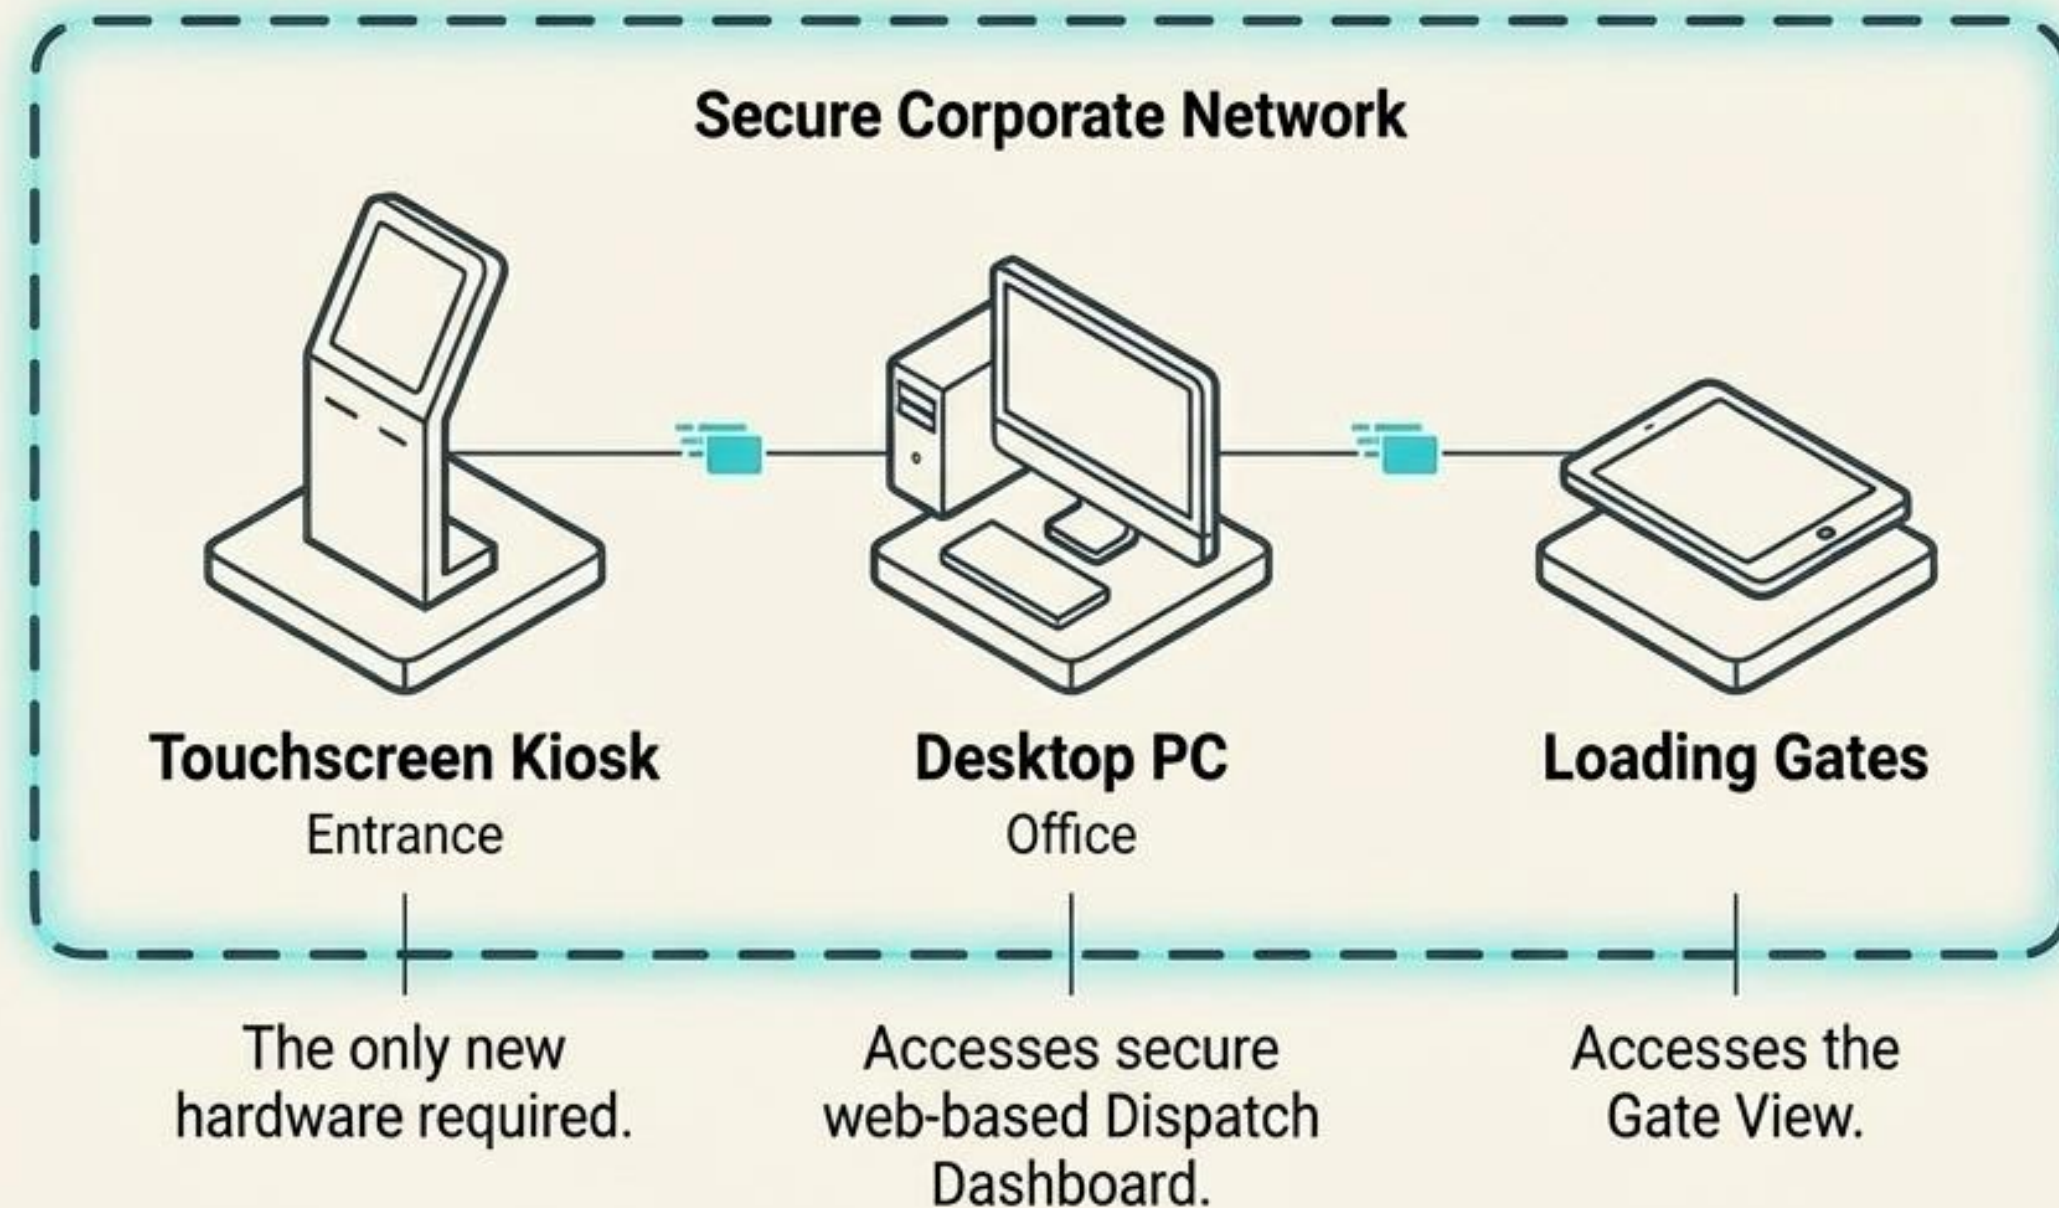

One-Click Completion

Warehouse staff see only the next truck for their specific gate. One tap marks the truck as 'Done', instantly updating the dispatch dashboard.

Architecture & IT Security

Operates strictly within your secure internal company network.

Zero Vulnerabilities

No public internet access required. Entirely insulated within your corporate network.

Zero Clutter

No complex physical ticket printers or paper jams to maintain.

Synthesis: From Chaos to Control

How Yard Manager v3 transforms the daily reality of your entire operation.

	The Old Way (Manual)	The New Way (Digital Flow)
Drivers	Confused, wandering the yard, frustrated by language barriers.	Clear instructions via SMS in their native language; resting securely in their cabs.
Dispatchers	Constant phone calls with loaders, blind spots on arrival order.	Live dashboard visibility, automated queuing, zero phone calls required.
Management	Unmanaged safety liability risks, gate bottlenecks.	100% legal compliance documented, saving 20-30 minutes per truck turnaround.

Real-World Proof: Münker Metallprofile

Transforming operations and eliminating a physical checkpoint.

The truck check-in solution is an absolute direct hit... Today, no phone calls need to take place between logistics and loaders. Drivers no longer wander the premises. The most central argument is the digital, multilingual safety briefing with signature. Because of this, an entire physical checkpoint on our premises has been eliminated.

— Sebastian Otto, Prokurist & IT Director, Münker Metallprofile
