

## About Humanizing Technologies

To “bring humanity into robotics” and “robots into society”, is a central focus at Humanizing Technologies. We develop software for Public Life Robots integrators and actively shape the market of current and future technologies. Suitable for each customer environment, our international partners sell our software and offer consulting services for market development of and with robots.

We believe technology is key to break down barriers and reducing labour and waste. Our vision is to create a streamlined and efficient eco-system of smart systems, with a ready-to-use software to deliver great customer experience.

Founded in 2016, Humanizing Technologies is one of the world's most valued providers of non-industrial robots and robotics software. Spread over 3 locations in Germany and Austria, we offer customer-centric, sustainable, and authentic, both ready-to-use and customized solutions.

**Humanizing Technologies stands for: Enthusiasm. Progress. Humanity.**
